

Energy

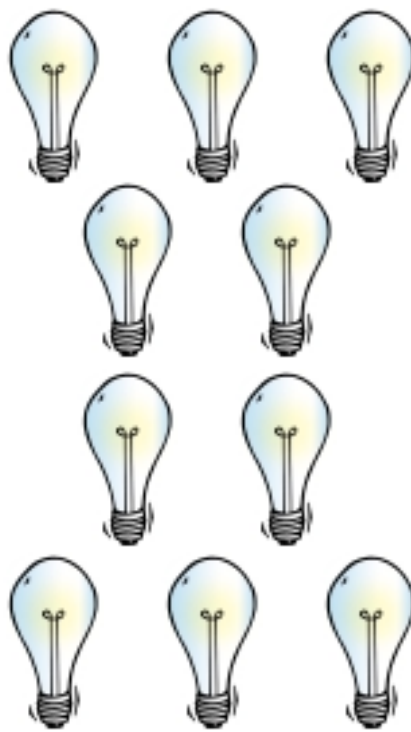

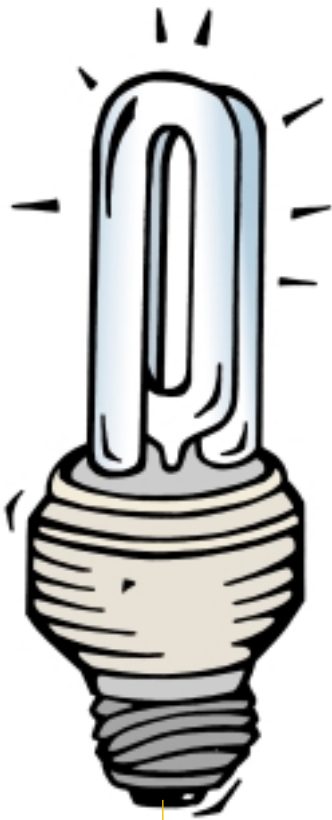

Conserving energy makes cents!

Turn it off when not in use. Switch off lights when you leave a room. You can save both energy and money!

Consider a programmable thermostat. Save 20 to 30% on heating and cooling bills while improving the comfort of your home.

When buying bulbs, choose compact fluorescent. They use 75% less energy than incandescent to get the same amount of light.

One compact fluorescent bulb lasts as long as ten incandescent bulbs. And, you'll save our landfill space at the same time.
